

Polyester PU Coated Work Gloves

Lightweight and flexible, these work gloves are made from polyester and coated with polyurethane (PU). They are designed for precision handling and general-purpose tasks, providing excellent dexterity and tactile sensitivity.

Product Overview

Professional Precision Handling

These lightweight and flexible work gloves are engineered for high-dexterity tasks. Featuring a polyester base with a durable polyurethane (PU) coating, they offer excellent tactile sensitivity and reliable grip. They are an ideal choice for assembly, inspection, and maintenance applications where precision is paramount.

Technical Details

Available Sizes

- L (9)

Material Composition

Polyester, Polyurethane (PU)

Performance Features

Key Benefits

High Dexterity • Abrasion Resistant • Enhanced Grip • Lightweight

Recommended Applications

- Precision Assembly
- Quality Inspection
- General Maintenance
