Overview

High-Performance Polyester Round Slings

These polyester round slings are engineered for heavy-duty lifting and rigging applications across construction and manufacturing sectors. Constructed with a seamless, continuous loop of high-tenacity polyester yarn encased in a durable protective sleeve, they offer superior flexibility and uniform load distribution. Designed to resist abrasion, UV degradation, and chemical exposure, these slings ensure reliable and secure lifting operations while minimizing potential damage to the lifted objects.

Technical Specifications

Material	100% High Tenacity Polyester
Working Load Limit (W.L.L)	1 Ton to 200 Ton or higher
Available Safety Factors	4:1, 5:1, 6:1, 7:1, 8:1

Dimensions

Width Range	40 mm
Length Range	1m to 80m (customizable)

Compliance

Industry Standards

EN1492 • CE Certified • TUV Rheinland • GS
