Product Overview

High-Performance Polyester Lifting Slings

These polyester webbing and round slings are engineered for safe, efficient heavy lifting in industrial and construction environments. Constructed from high-tension industrial yarn (100% PES), they feature a compact design with reinforced edges and loops to provide superior abrasion resistance and durability. The protective outer sleeve ensures a long service life, while the design allows for gentle handling of delicate loads without damage.

Technical Specifications

Load Capacity Range

0.5 T

Min Capacity

3000 T

Max Capacity

Material	100% High-Tension Industrial Polyester (PES)
Safety Factor	6:1, 7:1
Effective Length	100 m

Key Features

Design Advantages

- Compact design for easy handling
- High breaking elongation
- Reinforced loops and edges for abrasion protection
- Protective outer sleeve for inner strand safety
- Repairable round sling construction

Suitable Applications

Industrial Lifting • Construction Sites • Loading & Unloading
