

Polyethylene Film Blowing Machine

This high-performance plastic film blowing machine is designed for efficient polyethylene film production. It features a robust frame, precision extrusion system, adjustable die head, and automatic winding mechanism.

Overview

High-Performance Film Production

This high-performance plastic film blowing machine is engineered for the efficient production of high-quality polyethylene film. It features a robust frame construction and a precision extrusion system, ensuring reliability in demanding industrial environments. Equipped with an adjustable die head and an automatic winding mechanism, the system allows for versatile production of films across varying thicknesses and widths.

Technical Capabilities

Key Features

- Precision extrusion system
- Adjustable die head
- Automatic winding mechanism
- Optimized cooling system
- Precise temperature control

Typical Applications

Packaging Films, Agricultural Films, Industrial Films

Performance Metrics

Performance Highlights

1 High

Consistent Film Quality

1 Yes

Versatile Thickness Control
