

Polypropylene Monofilament Twisted Rope

This twisted rope is constructed from polypropylene monofilament. It offers tensile strength, abrasion resistance, and balanced load distribution.

ADDITIONAL IMAGES

Product Overview

Premium Polypropylene Monofilament Rope

This 3-strand twisted polypropylene monofilament rope is engineered for exceptional durability and versatility across marine, industrial, and agricultural applications. Its robust construction provides excellent resistance to corrosion, aging, and moisture absorption, ensuring long-term performance in demanding environments. Manufactured with high-strength fibers, this rope combines economy with reliable load distribution and resistance to abrasion.

Key Features

Performance Traits

Corrosion Resistant, UV Resistant, Moisture Resistant, Abrasion Resistant, Rot Resistant, Mildew Resistant, Floating

Technical Specifications

Construction Details

Feature	Specification
Material	Polypropylene Monofilament
Construction	3-Strand Twisted
Water Absorption	None
Stretch	Low

Logistics & Availability

Packaging Formats

- Hank
- Bundle
- Reel
- Coils
- Bags
