

Polypropylene Rope Cargo Net Sling

This cargo net sling is constructed from durable polypropylene rope. It is designed for lifting, securing, and transporting various cargo.

Product Overview

Heavy-Duty Cargo Containment

This Polypropylene Rope Cargo Net Sling is engineered for secure load containment and efficient material handling. Constructed from durable, high-strength polypropylene rope, it features a knotted mesh design that ensures reliability during lifting and transport operations. The material is specifically chosen for its resistance to abrasion, moisture, and UV degradation, making it suitable for demanding industrial and commercial environments.

Technical Specifications

Applications

- Lifting Operations
- Cargo Securing
- Material Transport
- Industrial Handling

Material	Polypropylene (P.P.)
Design Features	Knotted Mesh, Abrasion Resistant, Moisture Resistant, UV Resistant
