

Polypropylene Strapping Band

This high-strength plastic strapping belt is designed for securing and bundling heavy loads. Manufactured from durable polypropylene, it offers excellent tensile strength and resistance to tearing and abrasion.

Product Overview

High-Performance Polypropylene Strapping

This high-strength plastic strapping belt is engineered for secure bundling and load stabilization. Manufactured from durable polypropylene, it offers excellent tensile strength, tear resistance, and abrasion durability. It serves as a cost-effective and reliable alternative to steel strapping, making it ideal for palletizing and general industrial packaging applications.

Technical Specifications

Material	Polypropylene
Surface Finish	Smooth

Usage & Compatibility

Tool Compatibility

- Manual strapping tools
- Automated strapping tools

Primary Applications	Palletizing, Bundling, General Packaging
