

# Polyurethane Coated Ductile Iron Pipe

Ductile iron pipes feature a polyurethane coating for enhanced corrosion resistance. These pipes are suitable for water transportation and irrigation projects requiring durable and reliable piping solutions.

## Product Overview

### High-Performance Ductile Iron Piping

These ductile iron pipes feature an advanced polyurethane coating, engineered specifically for superior corrosion resistance and long-term durability in demanding environments. Manufactured using centrifugal casting technology, these pipes are ideal for large-scale water processing, irrigation engineering, and reliable water distribution systems. With a versatile range of diameters and lengths, they provide a robust solution for critical infrastructure projects requiring high strength and longevity.

## Technical Specifications

Centrifugal cast ductile iron pipes featuring high-durability polyurethane coating for water safety and corrosion resistance.

### Available Lengths

- 6 meters
- 8.15 meters

Diameter Range	DN80 - DN2600mm
----------------	-----------------

Manufacturing Process	Centrifugal Casting
-----------------------	---------------------

Coating Type	Polyurethane
--------------	--------------

## Quality & Compliance

### Compliance Status

Quality Management System Certified • Environmental Management System Certified • Occupational Health & Safety Certified

Certifications	ISO 9001, ISO 14001, GB/T28001, French BV, Korea KS
