

Polyurethane Foam Applicator Gun

This is a professional-grade foam applicator gun for precise, controlled application of polyurethane foam. The adjustable nozzle allows for variable foam bead size and it is compatible with standard threaded foam canisters.

Product Overview

Professional Polyurethane Foam Applicator

This professional-grade foam applicator gun is engineered for the precise and controlled application of polyurethane foam. Featuring a durable construction and an ergonomic handle, it ensures comfortable extended use on construction sites or DIY projects. The adjustable nozzle allows for variable foam bead size, helping to minimize waste while providing consistent flow for sealing gaps, insulating, and filling cracks.
