

# Polyurethane Mesh Conveyor Belt

This polyurethane mesh conveyor belt is designed for industrial material handling. It offers a longer wear life compared to woven wire screens.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Polyurethane Mesh Conveyor Belt

Engineered for superior industrial screening, this polyurethane mesh belt offers 2 to 5 times the wear life compared to traditional woven wire screens. Its flexible construction provides an excellent self-cleaning function, making it ideal for both wet and dry processing environments. Designed to handle challenging materials including corrosive substances like limestone, it offers versatile configurations to meet diverse operational requirements from top to bottom decks.

## Technical Features

### Performance Advantages

**5 x**

Wear Life Factor

### Key Operational Benefits

- Extended wear life vs. woven wire
- Wet and dry screening compatible
- Self-cleaning flexible material
- Corrosion resistance
- Customizable deck configurations

### Compatible Materials

Limestone, Corrosive materials, General Industrial Solids
