

Polyurethane Timing Belt Pulley

This timing belt pulley is made from durable polyurethane. It features a stepped design with a raised outer rim and recessed central section.

Product Overview

High-Durability Polyurethane Pulley

This polyurethane timing belt pulley is engineered for demanding industrial environments, serving as a critical spare part for truck cranes. Designed for compatibility with various QY-series models, its high-quality polymer construction offers excellent resilience and wear resistance. This component ensures smooth operation and extended service life in heavy-duty lifting applications.

Technical Specifications

Material	Polyurethane
Part Identification Code	DY.5K.I.4.2-1

Compatibility

Compatible Crane Models

- QY25K-II
- QY25K5
- QY50K
- QY70K-I

Component Category	Truck Crane Spare Part, Timing Belt Pulley
