Product Overview

Efficient Pool Filtration

This pool sand filter system offers a versatile filtration solution designed to keep swimming pool water clean and clear. The system is available in multiple tank configurations, ranging from 12L to 25L, allowing for scalability based on pool size. It features durable construction and flexible options, including an 'Easy Filter' variant that utilizes aqualoon filter media instead of traditional quartz sand for enhanced efficiency.

Technical Specifications

Available Tank Capacities

- 12L Tank
- 25L Tank

Recommended Pump Power

90 W

For 12L Tank

250 W

For 25L Tank

Features

Valve System

Top Valve Free • Economical Design

Filter Media Types

Quartz Sand, Aqualoon
