

Porcelain Pin Insulator

This is a porcelain pin insulator designed for high-voltage applications. It provides insulation and mechanical support for conductors in electrical systems.

Product Overview

High-Performance Porcelain Pin Insulators

These porcelain pin insulators are engineered for reliable performance in low to medium voltage electrical distribution systems. Designed with precision to meet rigorous technical standards, they provide excellent insulation and structural integrity. The range includes multiple profiles to suit various installation requirements, ensuring versatility and safety in power infrastructure projects.

Technical Specifications

Available Models

- 55-1
- 55-2
- 55-3
- 55-4
- 55-5

Material

Porcelain, High-Voltage Ceramic

Dimensional Data

Key Dimensions

Model	Pin Diameter (mm)
55-1	25.4
55-2	25.4
55-3	25.4
55-4	25.4
55-5	25.4

Standard Pin Diameter

25.4 mm

Diameter
