

Portable 100L Air Compressor with 65mm Piston

This portable air compressor features a 65mm piston and a 100L tank. It is capable of delivering a maximum pressure of 12 bar for various pneumatic applications.

Overview

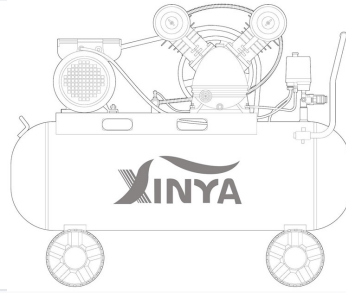

Portable electric belt-driven air compressor with 100L tank.

Professional Portable Air Compressor

This belt-driven portable air compressor features a 100-liter tank and a robust 65mm piston, designed to deliver a maximum pressure of 12.5 bar for versatile pneumatic applications. Engineered for durability, it includes a motor circuit breaker, an easy-open drain valve, and a pressure switch with adjustable settings for reliable, safe operation. The unit is built for convenience, featuring a plastic-coated tank, an integrated pressure gauge, and wheels for easy mobility in professional and workshop environments.

Technical Specifications

High-efficiency compressor head with 65mm piston.

Performance Metrics

2.2 kW

Motor Power

3 HP

Power Output

1100 RPM

Operating Speed

168 L/min

Max Air Flow

Pressure and Tank

Feature	Specification
Max Pressure	12.5 bar (181 psi)
Tank Capacity	100 L
Piston Size	65mm (1 pc)
Voltage	220V
Frequency	50Hz

Features

Integrated design for portability and ease of use.

Equipment Highlights

Belt-driven, 1-Cylinder, Closed belt guard, Motor circuit breaker, Pressure regulator, Quick connector, Portable (Wheeled), Plastic-coated tank
