

Portable 12V DC Compressor Car Fridge Freezer

This portable compressor car fridge freezer is designed for camping, travel, and outdoor activities. It features a high-efficiency compressor cooling system, allowing for precise temperature control and rapid cooling.

ADDITIONAL IMAGES

Overview

Professional Portable Refrigeration

This high-performance 12V DC compressor fridge freezer is designed for demanding mobile environments, blending European-inspired aesthetics with robust engineering. It features a dual-compartment design with precise temperature control, ensuring versatility for both freezing and refrigeration needs. Built with advanced thermal insulation and low-voltage protection, it offers reliable, energy-efficient cooling for vehicles, camping, and off-grid applications.

Performance & Technical

Energy Efficiency

Energy Level A++ • 68.4 kWh/annum

Low Voltage Protection

- 3 adjustable protection modes
- Automatic power cut-off for battery safety

Cooling Technology

High-efficiency 12V DC compressor

Insulation Thickness

50 mm

Design & Construction

Durability Features

- Waterproof control panel
- High-strength metal interior
- Reinforced corner protection
- Environmental protection plastic and rubber exterior

Lid Functionality

Patented bidirectional opening and removable top lid

Handle Load Capacity

150 kg

Interior Configuration

Dual Compartment, Solid Metal Basket, Non-contact LED Lighting
