

Portable 20L Dehumidifier with Electronic Control

This dehumidifier removes between 16 and 20 liters of moisture per day. It has a removable 3.5L bucket, automatic defrost, two fan speeds, and a washable air filter.

Product Overview

Efficient Moisture Control

This portable 20L dehumidifier is engineered for effective moisture removal in both residential and commercial environments. It features a user-friendly electronic LED control system, a compact rotary compressor, and convenient mobility options like roller castors. Designed for ease of maintenance, it includes a washable air filter, a front-removable water bucket, and an external drain connector for continuous operation.
