

Portable 360-Degree Camping Lantern

This portable camping lantern is designed for illumination in outdoor environments. It features a cylindrical transparent housing for 360-degree light distribution and a sturdy base with integrated legs for stable placement.

Overview

Versatile Outdoor Illumination

This portable camping lantern provides reliable 360-degree illumination for outdoor environments, making it an essential companion for camping and hiking. Designed for maximum utility, it features multiple charging options including AC/DC, car cigarette plug, and a manual hand crank for emergency power. Additionally, the integrated mini USB output allows users to charge mobile devices on the go.
