

Portable 5.5kW Diesel Generator with OHV Engine

This portable diesel generator is designed to provide electric power. It features a robust frame for protection and portability, along with a control panel for operation and monitoring.

Product Overview

Reliable Portable Power Solution

This portable diesel generator is engineered to deliver consistent and reliable electric power for various professional and industrial applications. Built with a robust protective frame, it ensures durability and ease of transport for demanding job sites. Featuring an OHV engine and an integrated brushless system, this unit is designed for efficient performance and long-term operational safety.

Performance Metrics

Maximum Output

5.5 kW

Max Power

Rated Output

5 kW
