

Portable AC 230V Generator

This portable generator is designed for providing AC 230V power. It features a compact design with integrated handles and wheels for easy transportation, making it suitable for various applications requiring mobile power supply.

Product Overview

Portable Inverter Generator

The ZG3000 is a high-performance portable generator engineered to deliver reliable AC 230V power in mobile environments. Its compact design, enhanced by integrated handles and wheels, ensures easy transportation and deployment across various job sites. As an inverter-based system, it provides stable power suitable for a wide range of professional applications.

Technical Specifications

Technology

Inverter

Output Voltage

230 V

Model Identifier

ZG3000

Design & Portability

Portability Features

- Integrated handles
- Built-in wheels
- Compact form factor
