

Portable Adjustable Flame Gun

This portable flame gun has a 60ml volume and a working time of 200. It features a piezoelectric ignition and can reach a temperature of 1350.

Product Overview

Professional Portable Flame Gun

This portable adjustable flame gun is designed for precision heating and soldering tasks. It features a compact, ergonomic design with a 60 ml fuel capacity, ensuring reliable performance for extended use. With a maximum temperature of 1350°C and adjustable flame control, it is an essential tool for professional applications requiring localized heat.
