

Portable Air Circulation Box Fan

This portable box fan is designed for circulating air in residential spaces. It features a square frame with a protective grille on both sides, encasing a multi-blade propeller.

Overview

Portable Air Circulation Solution

This 20-inch box fan is engineered for efficient air circulation in residential and light commercial environments. It features a robust, lightweight design with a built-in carry handle for maximum portability. With three distinct speed settings and quiet, vibration-free operation, it provides reliable cooling and airflow control.
