

Portable Air Compressor for Spraying and Spreading

This portable air compressor is designed for spraying machinery and spreading equipment. It features a pressure regulator and gauge for precise air pressure control.

Product Overview

Professional Performance in a Portable Design

This portable air compressor is specifically engineered for spraying machinery and spreading equipment applications. Built with a durable aluminum tank, it offers a lightweight yet robust solution for industrial projects requiring consistent compressed air. The unit features integrated wheels and a handle for superior maneuverability on job sites, while the built-in pressure regulator ensures precise control for high-quality output.

Technical Specifications

Tank Material	Aluminum
Intended Application	Spraying Machinery, Spreading Equipment, Industrial Projects, DIY

Features

Mobility

- Compact design
- Integrated carrying handle
- Heavy-duty wheels

Operational Controls

1 Included
Pressure Regulator

1 Included
Pressure Gauge
