

Portable Air Compressor for Tire Inflation and Pneumatic Tools

This compact air compressor is designed for inflating tires and powering pneumatic tools. Its efficient motor and robust housing ensure reliable performance and protection against impacts.

Product Overview

Professional Performance in a Compact Form

This portable air compressor is engineered for versatility, offering consistent air pressure for critical tasks ranging from tire inflation to operating pneumatic tools and spray painting. Built for durability, the unit features a robust housing that protects internal components from impact on busy job sites. With integrated safety mechanisms like an automatic shut-off system, it ensures reliable and secure operation for both professional technicians and DIY users.

Key Features

Capabilities

Tire Inflation, Pneumatic Tool Power, Spray Painting Ready, Integrated Handle, Automatic Shut-off

Technical Specifications

Operational Performance

1 Included

Pressure Regulation

Design & Utility

- Compact portable chassis
- Impact-resistant housing
- Integrated transport handle
- Automatic safety pressure cut-off
