

Portable Air Compressor for Vehicle and Garage Use

This portable air compressor is designed for inflating tires and other items in vehicles, garages, and workshops. It features a durable air hose, battery clamps, and a pressure gauge for monitoring inflation.

Product Overview

Versatile Inflation Solution

This portable air compressor is engineered for diverse inflation needs in vehicles, garages, and workshops. It features a robust motor, a durable air hose, and convenient battery clamps for reliable power connection. The unit is designed for extended use with an integrated cooling system to prevent overheating, while the onboard pressure gauge ensures precise monitoring during operation.

Technical Specifications

Performance Metrics

50 PSI

Max Pressure

30 A

Max Amperage

Duty Cycle

Standard

Voltage

12V DC

Design & Build

Portability & Handling

Carrying Handle, Compact Design, Battery Clamps

Thermal Protection

Yes

Hose Length

5 m
