

Portable Air Compressor with Pressure Gauge

This portable air compressor is designed with a pressure gauge and safety valve. It is suitable for various pneumatic applications.

Product Overview

Compact Power for Pneumatic Needs

This portable air compressor is engineered to deliver reliable performance for a variety of pneumatic applications. Featuring a 1.5 kW motor and a 10-liter tank, it offers an efficient balance of power and portability. Designed for professional use, the unit includes integrated pressure monitoring and safety systems to ensure consistent output and operational security.

Technical Specifications

Motor Power

1.5 kW

Power

2 HP

Horsepower

Performance Capacity

| Metric | Value |
|----------------------|-----------|
| Displacement (L/min) | 198/238 |
| Displacement (CFM) | 7/8.4 |
| Rated Speed (r/min) | 2850/3450 |

Physical Attributes

Size and Portability

- Dimensions: 41 x 38 x 73 cm
- Net Weight: 22 kg
- Tank Capacity: 10 L (2.65 USgal)

Operational Features

Operational Limits

115 Psi

Discharge Pressure

8 bar

Discharge Pressure

89 dB(A)

Noise Level

Identification

Model Details

Model: ZB-0.1/8, Code: SGBB9501
