

Portable Air Compressor with Pressure Gauge

This air compressor is designed for a variety of applications. It features a durable tank for storing compressed air and a pressure gauge for monitoring air pressure.

Product Overview

Professional Performance

The TC-50160 is a robust and reliable air compressor engineered for demanding B2B applications. Featuring a durable high-capacity tank and a powerful motor, it ensures a consistent and efficient air supply for your operational needs. Its portable design, complete with integrated wheels and handles, offers excellent flexibility for dynamic work environments.

Technical Specifications

Key Features

- Integrated pressure gauge
- High-durability tank construction
- High-performance motor
- Portable wheel system
- Ergonomic lifting handles

Design Attributes

Portable, Heavy-duty, Industrial
