

Portable Air Compressor with Twin-Cylinder Pump

This portable air compressor is equipped with a twin-cylinder pump for efficient air compression. It has a pressure regulator with gauge for controlling output pressure and a durable air tank.

Product Overview

Professional Twin-Cylinder Air Compressor

This portable air compressor is engineered with a high-performance twin-cylinder pump designed for efficient and reliable air compression. Its compact, mobile design makes it an ideal solution for professionals requiring power on the go for tasks such as spray painting, tire inflation, and operating various pneumatic tools. Built for durability and stability, the unit features a rugged air tank and an integrated pressure control system to ensure consistent output.

Technical Specifications

Model Identifier	JKW10
Pump Configuration	Twin-Cylinder
Equipment Highlights	Portable, Pressure Regulator, Pressure Gauge, Durable Tank, Carrying Handle, Rubber Stability Feet

Applications

Suitable Applications

- Spray painting
- Tire inflation
- Powering pneumatic tools
