

Portable Air Compressors for Assembly Lines

These portable air compressors are designed for assembly and production line applications. They feature durable construction, compact designs, and user-friendly controls for efficient operation.

Overview

Professional Assembly Line Compressors

These portable air compressors are engineered specifically for demanding assembly and production line environments. Featuring a robust, compact design with integrated mobility solutions, they offer reliable performance for various pneumatic tool applications. With user-friendly controls and durable construction, these units are built to streamline efficiency in professional manufacturing settings.

Technical Specifications

Available Model Numbers

- RAC1212BS
- RAC1710BN
- RAC1724BN

Primary Application

Assembly Line • Production Line

Design & Mobility

Compact Design, Durable Construction, Integrated Toolbox, Wheeled Frame
