

Portable Air Conditioner with Dehumidifier and Fan

This portable air conditioner provides 7,000 to 9,000 BTU cooling. It features dehumidifying and fan functions, electronic control with LED display, and utilizes CFC-free refrigerant.

Product Overview

Versatile Climate Control

This contemporary portable air conditioner offers a multi-functional solution for maintaining comfort in any space. It combines cooling, dehumidification, and fan modes, with an optional heater function to suit all seasons. Engineered for convenience, it features self-evaporating technology that eliminates the need for manual water bucket emptying, while its compact design and roller castors ensure effortless mobility between rooms.

Performance

Cooling Capacity

9000 BTU
Max Capacity
