

# Portable Air Conditioner with Dehumidifier and Fan

This portable air conditioner provides 7,000~9,000BTU cooling with dehumidifier and fan modes. It features electronic control with LED display, energy efficiency, low noise, and uses CFC-free refrigerant.

## Product Overview

### Versatile Climate Control

This contemporary portable air conditioner provides powerful cooling capabilities ranging from 7,000 to 9,000 BTU, making it an ideal solution for maintaining comfortable indoor environments. Designed for convenience, the unit features integrated dehumidification and fan functions, with an optional heater available for year-round climate management. Its patented self-evaporating technology eliminates the need for manual water drainage, ensuring a hassle-free experience for users in both home and office settings.

## Performance Specifications

### Cooling Capacity

**9000 BTU**

Max Capacity

**7000 BTU**

Min Capacity

Refrigerant

CFC-free

## Features & Functionality

Operating Modes

Air Conditioning, Dehumidifier, Fan, Heating (Optional)

Control System

Electronic control with LED display

## Design & Mobility

### Mobility

- Roller castors for easy room-to-room movement
- Compact design

### Maintenance

Self-evaporating technology • No dripping • No bucket emptying

### Operational Quality

- Energy efficient
- Low noise operation
- Low vibration
