

Portable Air Conditioner with Dehumidifier and Fan

This portable air conditioner features a slim design and provides 5,000 to 7,000 BTU cooling. It includes dehumidifier and fan functions, electronic control with LCD display, three cool/fan speeds, and a 24-hour timer.

Overview

Compact Comfort Solution

This portable air conditioner offers a versatile solution for indoor climate control, combining cooling, dehumidification, and fan functions in a slim, easy-to-carry design. Weighing under 25kg, it is engineered for mobility and convenience, making it perfect for localized cooling in small to medium-sized rooms. The unit features advanced self-evaporating technology, eliminating the need for manual water drainage and ensuring a hassle-free user experience.

Performance
