

Portable Air Conditioner with Dehumidifier and Fan

This ultra-compact portable air conditioner provides 7,000 to 8,000 BTU cooling. It features dehumidifier and fan functions, electronic control with LED display, a 24-hour timer, and optional heater function.

Overview

Compact Climate Control Solution

This ultra-compact portable air conditioner offers a versatile 7,000 to 8,000 BTU cooling capacity, making it an ideal choice for efficient indoor climate management. It seamlessly combines three functions—air conditioning, dehumidification, and fan operation—with an optional heater function for year-round comfort. Designed for convenience, the unit features patented self-evaporating technology, eliminating the need for manual water drainage or buckets.

Performance & Capacity

Cooling Capacity

8000 BTU

Max Cooling

Refrigerant

R-410A (CFC Free)

Features & Technology

Convenience Features

- Patented self-evaporating technology (no drip/bucket)
- 24-hour on/off timer
- Electronic control with LED display
- Remote control included

Operating Modes

Cooling, Dehumidifying, Fan, Heating (Optional)

Design & Usability

Design Highlights

Ultra-compact • Modern Design • Integrated Handle • Rolling Casters
