

# Portable Air Conditioner with Dehumidifying Function

This portable air conditioner is designed for spot cooling in rooms without central air conditioning. It features a digital display, adjustable fan speeds, a dehumidifying function, a flexible exhaust hose, and a window kit.

## Overview

### Versatile Portable Cooling Solution

This portable air conditioner is an ideal solution for spot cooling in environments without central air conditioning. It combines powerful cooling with a dedicated dehumidifying function and adjustable fan speeds to ensure optimal indoor comfort. Designed for convenience, the unit features rolling casters and a complete window installation kit for quick setup and easy portability between rooms.

## Key Performance Metrics

### Performance Highlights

#### 3 Functions

Integrated Modes

## Core Functions

Operating Modes	Cooling, Dehumidifying, Fan
Venting System	Hot air exhaust via flexible hose to exterior

## Design & Portability

### Mobility Features

- Compact design for space efficiency
- Rolling casters for easy transport
- Digital display for temperature control
- Adjustable fan speed settings

## Installation & Requirements

### Included Accessories

- Flexible exhaust hose
- Window installation kit
- User manual

Power Requirement	Standard electrical outlet
