

Portable Air Conditioner with Digital Display

This portable air conditioner is designed for spot cooling in residential or office environments. It features a compact design with integrated controls and a digital display.

Overview

Compact Cooling Solution

The KY-25 is a versatile portable air conditioner engineered for effective spot cooling in both residential and office settings. Designed with user convenience in mind, it features integrated digital controls and adjustable louvers to direct airflow precisely where needed. The unit incorporates a self-evaporative system to minimize manual maintenance, alongside a removable air filter for easy cleaning.
