Portable Air Conditioner with Exhaust Hose

This portable air conditioner is designed for spot cooling. It features a flexible exhaust hose, adjustable louvers, a digital control panel, and casters for mobility.

Product Overview

Versatile Portable Cooling Solutions

These portable air conditioners are designed for efficient spot cooling in residential or office environments. Equipped with flexible exhaust hoses and mounted on smooth-rolling casters, they offer exceptional mobility and ease of installation. With precise temperature controls and quiet operation, these units ensure a comfortable climate in areas ranging from 18 to 30 square meters.

Performance Metrics

Cooling Capacity Comparison

Model	Cooling Capacity	Power Consumption	Application Area
TJ-MAC12000	12000 BTU	1350	18-25¡
TJ-MAC14000	14000 BTU	1500	22-30¡

Noise Level	48-54 dB(A)
Temperature Setting Range	18-32°C

Design & Features

Key Features

- Flexible exhaust hose included
- Digital control panel
- Adjustable airflow louvers
- Casters for mobility
