Overview

Versatile Climate Control Solution

This portable air conditioner is engineered for efficient and convenient climate control in various indoor environments. Featuring a compact, mobile design with integrated caster wheels, it offers four distinct operating modes including cooling, heating, fan, and dehumidification. With user-friendly controls, a programmable 24-hour timer, and a self-evaporative system that eliminates the need for manual water drainage, this unit provides a reliable, low-maintenance solution for home or office comfort.

Performance & Features

Smart Features

- 24-Hour Programmable Timer
- Sleep Mode
- Smart Functionality
- Digital Display

Operating Modes

Cooling, Heating, Fan, Dehumidify
