

Portable Air Conditioner with Self-Evaporative System

This portable air conditioning unit is designed for spot cooling in residential or commercial environments. It features adjustable temperature settings, multiple fan speeds, and a self-evaporative system for condensate management.

Product Overview

Versatile Portable Cooling Solution

This portable air conditioning unit is designed for efficient spot cooling in both residential and commercial environments, such as offices, kitchens, and bedrooms. Featuring a self-evaporative system for streamlined condensate management, it offers a flexible solution for localized temperature control. The unit is equipped with a digital display and remote control, ensuring convenient operation for professional and home users alike.
