

Portable Air Cooler and Heater with Digital Display

This portable climate control solution provides both cooling and heating. It is equipped with adjustable fan speeds, a digital display, a built-in timer, and caster wheels for mobility.

Overview

Versatile Climate Control Solution

The AC51 is a multifunctional climate control unit designed to provide both cooling and heating capabilities in a single, portable device. Its modern design features a louvered front for optimized air distribution and a digital display for intuitive operation. With built-in caster wheels, this unit offers exceptional mobility, making it an ideal solution for maintaining comfort across various indoor environments.
