

Portable Automotive Jump Starter with LED Light

This portable jump starter is designed for automotive use. It features a high-capacity internal battery for jump-starting vehicles with depleted batteries and includes a built-in LED light.

Product Overview

Reliable Emergency Power

This portable automotive jump starter is an essential tool designed for emergency vehicle recovery. Featuring a high-capacity internal battery, it reliably jump-starts vehicles with depleted batteries in various conditions. The unit is equipped with heavy-duty clamps for secure connections and includes a built-in LED light to assist with repairs in low-light environments.
