

Portable Bag Stitching Machine

This portable bag closer sews bags made of paper, burlap, plastic, cotton, and other materials. It features a single-thread chain stitch, automatic thread cutter, and an integrated lubrication system.

Overview

Professional Bag Closing Solution

This portable bag stitching machine is engineered for high-efficiency closing of various bag types, including paper, burlap, plastic, and cotton. Designed for durability in demanding environments like agriculture, food processing, and chemical industries, it features a robust construction that ensures reliability. With its lightweight design and integrated lubrication system, it offers ease of operation while delivering secure, single-thread chain stitches for professional packaging results.

Technical Specifications

Stitch Type	Single-thread chain stitch
Lubrication	Yes
Thread Cutting	Automatic

Compatibility

Industry Applications

- Agriculture
- Food Processing
- Chemical Industry

Compatible Materials	Paper, Burlap, Plastic, Cotton
----------------------	--------------------------------

Key Features

Design Highlights

Portable • Lightweight • Rugged Construction • Easy to Operate
