

# Portable Bluetooth Loudspeaker with Wooden Enclosure

This portable Bluetooth speaker is designed for outdoor use and delivers stereo sound without the need for a power supply. Its built-in lithium battery provides extended standby time, and it features a sliding button design for easy operation.

## Overview

### Professional Audio Excellence

This portable Bluetooth loudspeaker features a premium MDF wooden cabinet construction with a sophisticated PVC finish and metal grille. Engineered with a powerful digital amplifier and dual 4-inch full-frequency drivers, it delivers robust audio performance. Designed for versatility, it supports multiple input interfaces including FM, USB, and TF cards, while providing convenient device charging capabilities.
