Overview

Versatile Spider-Design Bluetooth Speaker

The LYB-021L is a unique portable Bluetooth speaker featuring six flexible 'magic twist' legs that provide exceptional stability and double as an independent smartphone holder. Engineered with digital sound Amp technology, it delivers high-quality mono audio through a 40mm driver and passive radiator system. Its versatile connectivity options include Bluetooth V3.0+EDR for wireless streaming and a 3.5mm AUX input for non-Bluetooth devices.
