Overview

Professional Grade Portable Cement Mixer

This 200L portable cement mixer is engineered for commercial applications and tradesman use, offering a robust solution for mixing cement and mortar. Featuring a heavy-duty welded steel frame and a double belt-driven 1HP electric motor, it ensures reliable performance on demanding jobsites. Its puncture-proof wheels and ergonomic design allow for easy mobility and uninterrupted operation across various construction environments.

Key Performance Metrics

Performance Highlights

200 L

Drum Capacity

1 HP

Motor Power

16 in

Wheel Size

Technical Specifications

Capacity (Cubic Feet)	3.5 Cu
Motor Type	CMG Electric Motor
Drive System	Double belt driven

Construction & Durability

Key Components

- Steel mixing bowl
- Bearing arm
- Poly pulley cover
- Puncture proof tyres
- Tilting mechanism for pouring

Frame Construction

Heavy duty welded steel frame

Surface Treatment

Powder coated steel

Safety & Controls

Safety Mechanisms

ON/OFF Switch, Remove-to-Lock Safety, Protective Motor Housing, Secure Cable Entry

Logistics & Packaging

Shipping Configuration

Component	Packaging Method
Bowl	On pallet
Frame	In bulk
Spare Parts	On pallet
Container Load	80pcs per 40HC
