

Portable Cement Mixer with Steel Frame

This portable cement mixer is designed for small to medium-scale construction projects. It ensures efficient and consistent blending of cement, sand, and aggregates with its durable steel frame and high-torque motor.

Product Overview

Portable Cement Mixer

This portable cement mixer features a robust steel frame and a high-torque motor, designed for efficient blending of cement, sand, and aggregates. Its compact, swivel-capable design ensures easy maneuverability and complete discharge, making it an ideal tool for small to medium-scale construction projects. The unit is engineered for convenience, offering quick assembly and easy transportation in standard vehicles.

Design & Construction

Frame Material	Steel
Finish	Powder Coated
Drum Surface	Smooth (dirt-resistant)

Operational Features

Drive Type	Direct gear drive
Tilting Capability	360-degree swivel and tilt
Safety Features	Totally enclosed drive, Direct gear drive

Logistics & Transport

Transport Features

- Wheeled for floor mixing and batch transportation
- Separate stand design for quick assembly
- Boxed for easy stocking
- Fits in van or hatchback
