

Portable Circular Saw for Wood and Materials

This portable circular saw is designed for cutting wood and other materials. It features a high-speed motor, adjustable cutting depth, and a durable blade guard for safety.

Overview

High-Performance Portable Circular Saw

This portable circular saw is engineered for precision and efficiency when cutting wood and various construction materials. Equipped with a powerful 1400W motor, it delivers consistent high-speed performance suitable for both professional construction sites and demanding DIY projects. The design prioritizes safety and versatility, featuring an adjustable cutting depth and a durable, integrated blade guard.

Technical Specifications

Rated Power

1400 W

Power Output

Model Identifier

M50-185

Features

Key Features

High-speed motor, Adjustable cutting depth, Durable blade guard, Portable design

Applications

Primary Applications

- Woodworking
- Construction materials cutting
- Professional carpentry
- DIY projects
