Product Overview

Advanced UV-Ozone Sanitization

This portable clothes sterilizer offers a sophisticated solution for maintaining hygiene on the go. Utilizing dual UV lamp technology and ozone oxidation, it effectively eliminates bacteria and odors from clothing, towels, and personal items like mobile phones. Its compact, travel-friendly design ensures you can maintain a sterile environment for your essentials wherever you are.

Technical Specifications

Sterilization Technologies	UV Lamp, Ozone Oxidation, Negative Ion
Control System	Microcomputer-controlled, one-button automatic operation
Lamp Source	Imported quartz lamp

Compliance & Quality

Testing & Compliance

- Test qualification report from national experimental microorganism testing center

Design & Usage

Design Highlights

Portable • Compact • Travel-friendly • Electroplate Finish

Suitable Items

- Clothing
- Towels
- Mobile phones
- Toothbrushes
