

Portable Concrete Cut-Off Saw

This portable cut-off saw is designed for demanding cutting applications on construction sites and in industrial settings. It is ideal for cutting concrete, asphalt, and other hard materials.

Product Overview

Professional Grade Cutting Power

The EHS-350A is a portable cut-off saw engineered for high-demand cutting applications on construction sites and in industrial environments. Designed for efficiency and operator safety, this unit features a robust engine capable of tackling tough materials like concrete and asphalt. Its ergonomic build minimizes operator fatigue during extended use, while the integrated safety guard offers essential protection against debris and sparks.
