

Portable Concrete Cut-Off Saw

This portable cut-off saw is designed for demanding cutting applications. It features a robust construction and powerful engine for reliably cutting concrete, asphalt, and other materials.

Product Overview

Professional Cutting Performance

The EHS-350C is a portable cut-off saw engineered for demanding cutting applications in construction, demolition, and maintenance environments. Featuring a robust construction and a powerful engine, it delivers consistent reliability when cutting through concrete, asphalt, and other tough materials. The ergonomic design prioritizes operator comfort and control, ensuring precision and safety during intensive use.

Technical Specifications

Model Number	EHS-350C
Certifications	EPA, CE

Performance Metrics

Performance Highlights

350 mm
Blade Capacity

Applications

Suitable Materials

- Concrete
- Asphalt
- Hard construction materials
