

Portable Concrete Mixer

This portable concrete mixer features a rotating drum for the efficient combination of cement, sand, and aggregates. Mounted on a wheeled chassis, the mixer is easily maneuverable and ideal for small to medium construction projects.

Overview

Versatile Portable Concrete Mixer

The JF100 Portable Concrete Mixer is designed for efficient mixing of cement, sand, and aggregates on small to medium-sized construction projects. Featuring a robust drum manufactured via molding rather than welding, it offers enhanced durability and high mixing performance. Its wheeled chassis ensures excellent maneuverability, making it a reliable solution for job sites requiring frequent relocation.

Technical Specifications

Total Drum Capacity	500 L
Discharge Volume	140 - 210 L
Mixing Drum Speed	25 r/min

Power Options

Engine & Motor Options

- 4 kW Electric Motor
- 6 hp Diesel Engine
- 5.5 hp Gasoline Engine

Engine Rotate Speed	3000 r/min
