

Portable Concrete Mixer

This portable concrete mixer is designed for on-site mixing of concrete. It features a rotating drum for thorough mixing, a loading hopper for easy material input, and a water supply system for precise water addition.

Product Overview

Portable Concrete Mixer

This portable concrete mixer is engineered for efficient on-site concrete preparation. Featuring a robust rotating drum, an integrated loading hopper, and a precise water supply system, it ensures consistent material mixing. Mounted on a wheeled chassis with support legs, the unit offers excellent mobility and stability, making it a versatile solution for various construction applications.

Design & Construction

Key Features

- Rotating drum mechanism
- Integrated loading hopper
- Water supply system
- Wheeled chassis for mobility
- Support legs for stability

Drum Material Options

Stainless Steel, Plastic

Pricing Factors

Pricing Factors

Factor	Description
Quality	Varies based on material grade and assembly standards
Components	Mixing system efficiency and drum material (e.g., stainless or plastic)
Dimensions	Size and capacity variations impact overall cost
Logistics	Influenced by custom duties and transport costs
